

TechnologyOne Financials

Do you have the real-time information you need to successfully drive strategic decision making?

Successful organisations today know their bottom line and everything that contributes to it.

What you need is a core management system to drive strategic decision making by anticipating and adapting to shifting organisational priorities, while managing the growing demands of customer and stakeholder services.

To address these complex and competing challenges, it is vital that your organisation has software that provides real-time, integrated financial management and accounting information to drive the organisation, as well as your strategic and operational decision making.

TechnologyOne's best in class, market leading solutions work together as one 'out of the box' solution with one user interface. You get organisation-wide benefits and seamless integration with all our products, which includes Financials, Supply Chain, Business Intelligence, Enterprise Budgeting, Performance Planning, Property & Rating, Human Resource & Payroll, Student Management, Works & Assets, Enterprise Content Management and Customer Relationship Management.

Our software equips your organisation with the tools to proactively manage the complex and increasingly fast-paced business environment.

Benefits of TechnologyOne Financials

TechnologyOne Financials provides you with the tools to manage your organisation's financial data in one effective system with the ability to produce reports targeted to assist with strategic decision making.

Flexibility

Once implemented, our software is regularly updated to meet new requirements as they arise, without requiring costly upgrades or external consultants. TechnologyOne Financials is a customer extensible system that you can easily and quickly adapt to meet your needs, now and in the future.

Ease of Use

TechnologyOne applies a unique 'workplace' concept to the whole solution. A workplace gives users a consistent experience for the role or roles they are performing. Each user is delivered a set of menus and workflows that represent their business processes.

Unlimited Ledgers

An unlimited, multi-ledger design gives you the power to track, monitor, control, analyse and report on any information within the general ledger, as well as in any number of user-defined subsidiary ledgers.

Real-Time Reporting

With a centralised system, data is automatically recorded and accurately applied throughout. The sophisticated reporting capabilities enable all users to generate concise, real-time reports on demand to suit the needs of operational staff or management.

Scalability

TechnologyOne Financials is scalable to meet the requirements of the largest enterprises, while providing an intuitive, user-focussed interface to ensure the rich features are not compromised.

Remote Access

Even staff who cannot log into the system due to time pressures or their remote location can receive important and timely information for action via a number of methods, including email and SMS.

Overview

TechnologyOne Financials deliver organisation-wide control and integration of information essential to improving the bottom line while meeting statutory financial reporting requirements. With rich functionality, powerful online enquiries and versatile reporting ability, its unique architecture allows users to create an unlimited number of ledgers delivering the ability to manage any range of items such as mobile phones, motor vehicles, provisions, capital works and travel.
