

A Partnership to Drive Your Business Success

TechnologyOne is a leading provider of enterprise software solutions. For more than 20 years we have been enabling organisations to optimise their performance with our deeply integrated software solutions. We support business, government, financial services, health and community, education and the utilities sectors. We continue to succeed and have expanded to become a multinational software company in an industry where many have failed.

Our integrated software solutions help people within organisations to collate, analyse, interpret, process, report on and find meaning in the information which drives their organisation.

Tens of thousands of people each day use our solutions which we develop, implement and support. Our organisationwide solution suite, integration solutions and custom designed solutions provide world-class services which are based on leading-edge technology and are backed up by a substantial R&D program. This offers our customers a long term, secure and valuable partnership.

We have offices in each State and Territory of Australia as well as New Zealand, Malaysia, the South Pacific and the United Kingdom.

Our customers rely on us to deliver continuous improvement to our suite of best in class solutions, which include:

- TechnologyOne Financials
- TechnologyOne Human Resource & Payroll
- TechnologyOne Supply Chain
- TechnologyOne Business Intelligence
- TechnologyOne Enterprise Budgeting
- TechnologyOne Property & Rating
- TechnologyOne Performance Planning
- TechnologyOne Student Management
- TechnologyOne Asset Management
- TechnologyOne Enterprise Content Management
- TechnologyOne Customer Relationship Management

TechnologyOne is the sum total of our dedicated and talented people. We are always accountable. We take total responsibility for the success of every customer's investment and our solutions deliver exceptional technology. We guarantee that your concerns are our concerns, whether your focus is on business needs, the technology, excellence in service, or an on-time, on-budget implementation. We're always ready to deliver our best.

Our commitment to creativity propels continuous innovation of our software to ensure it delivers exceptional business performance today, tomorrow and the future. Our solutions are intuitive, functionally rich, powerful, simple to use, fast, and easy to implement.

A Comprehensive Solution Suite

Best in class solutions — organisation-wide integration

TechnologyOne provides totally integrated enterprise software solutions. Each product in our solution suite stands alone as best in class, or can seamlessly join together to create one total enterprise solution.

TechnologyOne Financials

TechnologyOne Financials delivers organisation wide control and integration of financial information essential to strategic decision making and improving the bottom line. With rich functionality, powerful online enquiries, and versatile reporting, its unique architecture enables creation of an unlimited number of ledgers for any range of items, enabling both macro and micro control and analysis.

TechnologyOne Human Resource & Payroll

TechnologyOne Human Resource & Payroll is a complete human resource management system that empowers organisations to make better people related decisions. It delivers true integration with other organisational systems, business process automation and career planning and self service capabilities.

TechnologyOne Supply Chain

TechnologyOne Supply Chain automates and optimises each stage or 'cost pocket' of the purchasing process to deliver significant cost savings. Simple to use for even the most distributed organisation it delivers advanced workflow to efficiently and effectively requisition, order, receive, distribute and pay for your organisation's resources.

TechnologyOne Business Intelligence

TechnologyOne Business Intelligence comes data-aware for TechnologyOne software to deliver immediate business benefits. From a user-friendly dashboard, monitor, visualise and take action across software system boundaries with an integrated, real-time, organisation-wide view of key strategic and operational metrics.

TechnologyOne Enterprise Budgeting

TechnologyOne Enterprise Budgeting has been designed from the ground up to link business drivers to financial implications – rather than the other way around. Enabling the budgeting process to be devolved throughout the organisation, it meaningfully connects both the business and financial people by being intuitive to use, linking operations with budgeting and forecasting functions.

TechnologyOne Property & Rating

TechnologyOne Property & Rating is an expansive, functionally rich solution that covers all aspects of property management, revenue (rating and water) management, customer management, and a wide range of regulatory applications. Its unique design provides the agility to anticipate and meet the rapidly changing needs of the new self-service, customer centric business model.

TechnologyOne Performance Planning

TechnologyOne Performance Planning is a total corporate performance management solution that enables organisations to define strategic goals, outcomes and outputs, and measure and manage performance against them. It delivers a set of integrated, iterative management and analytical processes that align the philosophies of quadruple bottom line reporting to promote improved planning, reporting and organisational performance.

TechnologyOne Student Management

TechnologyOne Student Management empowers all stakeholders in an education institution by providing online, real time access to user-specific information in order to self-serve or make effective business decisions. It provides a total education solution that enables students, academics, administrators and organisational partners to all connect through one intuitive application.

TechnologyOne Asset Management

TechnologyOne Asset Management manages the complete asset lifecycle, including construction and acquisition, operations, maintenance, and disposal. It brings together human, physical and financial resources into a single solution, delivering a 360 degree view of asset and project management activities through a totally integrated project management, work management, asset maintenance, asset capitalisation, contract management, job costing and timesheets, billing, and reporting solution.

TechnologyOne Enterprise Content Management

TechnologyOne Enterprise Content Management tracks, links and creates workflows for both electronic and paper-based content throughout an organisation. As a record and document repository that manages version control with predefined access rights, it can enhance customer service, and enforce process control, whilst improving communications management at every level of an organisation.

TechnologyOne Customer Relationship Management

TechnologyOne Customer Relationship Management allows organisations to manage critical relationships with all stakeholders. Offering all the features you would expect from a functionally rich CRM solution, it differentiates itself with the ability to cater to the specific needs of Local, State and Federal Government, community service organisations, as well as sales and service focused organisations.

TechnologyOne Adapt

TechnologyOne Adapt develops industry specific software extensions to TechnologyOne's solution suite. Based on the team's innovative and creative efforts to date, Adapt can also supply a number of modules that can be customised to meet specific requirements, delivering a balance between the cost efficiencies of an 'out of the box' solution with the configurability of a custom built solution.

TechnologyOne Plus

TechnologyOne Plus develops custom software solutions and services to meet customer-specific needs where an 'out of the box' product will not satisfy their requirements. Offering a broad range of consulting and project based services, Plus' expertise spans the system development lifecycle. In addition, Plus' managed application service will deliver the appropriate resources to enable dependable and consistent management of new and legacy applications.
